Dear Colleague,

Unfortunately, I don't know exactly which publication you mean. Regarding catalase, I once started working on ions in Zurich but didn't publish anything because no satisfactory conclusion was reached. There is only one dissertation on this subject by A. Madinaeoesha.

If you would like, I could try to obtain a copy of it for you. There's probably only one used copy left.

With warm regards to you and your dear family,
Your faithful Willstätter
